TOP FEATURES

- The LED floor brush: is equipped with an electric motor that drives the cleaning roller, increasing vacuuming efficiency on various types of floors and carpets. The built-in LED lighting makes it easier to see dirt in hard-to-reach, poorly lit areas (e.g., under furniture).
- Small 2-in-1 brush: it is designed for vacuuming upholstery and textiles and for removing dust from delicate items such as picture frames, lampshades, keyboards, books, etc.
- Telescopic suction tube: allows for length adjustment of the tube to meet the individual needs of the user. This enables the tube to be adjusted to a comfortable position while vacuuming, increasing comfort and making it easier to reach difficult areas.
- Allergy-friendly HEPA filter: captures viruses, bacteria, dust mites, fungi, and very fine dust particles, which are particularly dangerous for people with respiratory diseases. The filter should be regularly washed with lukewarm water and thoroughly dried before reuse. The set includes 2 HEPA filters.
- Crevice nozzle: it is designed for cleaning places such as corners, grout lines, upholstery crevices, car interiors, and hard-to-reach areas.
- The dust container has a capacity of 0.7 liters. To empty it, simply press one button.
